## Dear ECST-2 Investigators

We are pleased to send you the **June/July 2021 Newsletter** for the ECST-2 Study and we hope you all are doing well.

- Currently, our main focus is on the **missing key variables from baseline up to the 2 year follow ups**, and we invest great efforts in completing those data. We want to complete the data by 1<sup>st</sup> September 2021.
- **We have started to send out excel spreadsheets with the missing data to each site, and several sites already have received their spreadsheets.**
- We kindly ask to fill in the missing data directly in the spreadsheet, or explain why they are missing.
- **A BIG THANK YOU to those who have already supplied missing data!**
- We will also continue to contact you regarding patients late for scheduled follow-up (*see attached SOP for details of how to chase up missing or late patients* ).
- We continue to monitor outstanding 2-year follow-up brain MRI scans. Please note any MR imaging, even if delayed, is much better than none at all!

Please keep in mind:

- Please continue with the study visits as scheduled in the trial protocol
- Important: If you perform a follow-up visit by telephone, please enter "telephone visit" in the "Notes" filed at the bottom of the main follow-up form (e.g. at the 2-year visit, this form is called "Two Year Follow Up Form"). This is important, because the maximum achievable score is lower for the telephone MoCA than the original MoCA. *Please see attached the telephone MoCa.* Don't forget to enter the date of the visit or telephone!
- Please send all MoCAs (clinical and telephone versions) as well as ultrasound forms anonymized (only patient ID) as a PDF to your Trial Managers Laurine and Marina.

Many thanks for your collaboration, and we all appreciate your hard work and efforts in support of the ECST-2 Study!

We wish you all a beautiful summer, stay healthy!

With best regards of the Trial Management Team

Prof. Martin Brown, MD
